

Carolina Mojo vs. Port City — Scouting Report

Matchup Overview

Team	Record	Games Logged	Steals/Game	SB Success	Sac Bunts
Port City Frenzy	11-4-1	16	3.6	95%	4
Carolina Mojo	12-12-1	25	2.5	94%	8

No head-to-head record is assumed here — this compares each team's full season sample independently.

Carolina Mojo: Threats to Watch

Top hitters by on-base + slugging, minimum 8 plate appearances.

Batter	PA	AB	AVG	OBP	SLG	HR	XBH	K%	BB%
Tristan Baldwin	15	11	0.545	0.667	1.273	1	5	6.7%	20.0%
Madisyn Hinson	56	50	0.520	0.571	0.860	1	12	10.7%	10.7%
Morgan Conley	64	47	0.383	0.547	0.404	0	1	4.7%	20.3%
Layla Tyler	38	30	0.367	0.500	0.400	0	1	26.3%	21.1%
Reese Parongao	34	25	0.360	0.471	0.440	0	2	17.6%	17.6%
Kirkland Blizzard	36	33	0.394	0.444	0.545	0	3	30.6%	8.3%
Emerson Dorsey	46	38	0.368	0.457	0.553	1	5	13.0%	10.9%
Azaria Lykes	44	37	0.405	0.432	0.432	0	1	11.4%	6.8%
Marissa Hollister	47	36	0.306	0.468	0.528	0	6	21.3%	23.4%
Scarlett Hamlin	55	37	0.270	0.473	0.297	0	1	23.6%	29.1%

- **Morgan Conley** almost never strikes out (5% K rate over 64 PA) — pitch to soft contact, not around her.
- **Scarlett Hamlin** walks 29% of the time (55 PA) — very patient, attack the zone early rather than nibbling.
- **Hayden Stiglbauer** have not hit much this season (high strikeout rate, low average) — challenge them in the zone, don't waste good pitches being careful.

Carolina Mojo: Pitching Staff

Pitcher	BF	K%	BB%	Hit%	WP	PB
Emerson Dorsey	132	10.6%	18.9%	26.5%	13	5
Madisyn Hinson	111	9.0%	17.1%	19.8%	0	10
Layla Tyler	71	16.9%	14.1%	28.2%	2	4

- **Emerson Dorsey** is wilder (19% walk rate) – work the count, take borderline pitches.

Carolina Mojo: Team Tendencies

- **Base stealing is a major weapon:** 63 attempts across 25 games (2.5/game) at a 94% success rate. Prioritize quick catcher pop times and varied pitcher hold times.
- **Bunts more than average** (8 sac bunts in 25 games) – stay ready for small ball.

Port City Gameplan

Suggested Batting Order

Slot	Batter	PA	AVG	OBP	SLG	K%	BB%
1	Emma Goodman	30	0.476	0.633	0.762	10.0%	30.0%
2	Lucy Calla	32	0.429	0.562	0.524	9.4%	25.0%
3	Reagan Zimmerman	36	0.462	0.556	0.538	13.9%	16.7%
4	Caroline Edwards	22	0.400	0.455	0.900	27.3%	9.1%
5	Finley Andrews	28	0.273	0.429	0.318	17.9%	21.4%
6	Emma Lavelle	24	0.278	0.458	0.389	41.7%	25.0%
7	Paisley Bacon	27	0.304	0.407	0.304	18.5%	14.8%
8	Emory Ebner	27	0.273	0.333	0.364	22.2%	7.4%
9	Caroline Ogburn	34	0.125	0.382	0.125	23.5%	23.5%
10	Claire Ellisor	14	0.091	0.143	0.091	14.3%	7.1%

Ordered by a blended on-base/power/strikeout score ($OBP \times 0.5 + SLG \times 0.3 - K\% \times 0.2$), with the single highest-slugging bat pulled into the cleanup (4th) slot. Players below the plate-appearance threshold, and any names listed in *exclude_batters*, are left off.

Suggested Starting Pitcher

Pitcher	BF	K%	BB%	Hit%	WP	PB
Lucy Calla	121	23.1%	14.0%	17.4%	8	2
Claire Ellisor	55	18.2%	18.2%	18.2%	5	1

Against this opponent, control matters more than usual. Carolina Mojo steals at a 94% success rate – every walk and wild pitch is a near-certain stolen base. Lucy Calla's walk rate (14%) and wild-pitch rate (7%) make her the safer choice here.

Auto-Generated Strategy Notes

1. **Emerson Dorsey** is wilder (19% walk rate) — work the count, take borderline pitches.
2. **Morgan Conley** almost never strikes out (5% K rate over 64 PA) — pitch to soft contact, not around her.
3. **Scarlett Hamlin** walks 29% of the time (55 PA) — very patient, attack the zone early rather than nibbling.
4. **Hayden Stiglbauer** have not hit much this season (high strikeout rate, low average) — challenge them in the zone, don't waste good pitches being careful.
5. **Base stealing is a major weapon**: 63 attempts across 25 games (2.5/game) at a 94% success rate. Prioritize quick catcher pop times and varied pitcher hold times.
6. **Bunts more than average** (8 sac bunts in 25 games) — stay ready for small ball.

Stats pulled from each team's full public GameChanger play-by-play logs. Batter identity recovered from free-text play descriptions rather than the scraper's own (unreliable) batter-tracking column. Sample sizes are typically 20–100 PA per player — enough to see real tendencies, not enough to treat any single number as certain, especially under ~20 PA.
