

Oct Outlaws 2012 vs. Port City — Scouting Report

Matchup Overview

Team	Record	Games Logged	Steals/Game	SB Success	Sac Bunts
Port City Frenzy	11-4-1	16	3.6	95%	4
Oct Outlaws 2012	21-8-0	29	3.3	95%	3

No head-to-head record is assumed here — this compares each team's full season sample independently.

Oct Outlaws 2012: Threats to Watch

Top hitters by on-base + slugging, minimum 8 plate appearances.

Batter	PA	AB	AVG	OBP	SLG	HR	XBH	K%	BB%
Addison Pegg	58	48	0.542	0.621	0.917	2	12	8.6%	13.8%
Audrey Queen	53	45	0.533	0.604	0.756	1	6	5.7%	13.2%
Isabel Montanez	53	40	0.425	0.566	0.725	1	7	15.1%	22.6%
Addie Morgan	67	59	0.458	0.522	0.864	2	16	9.0%	11.9%
Kinslee Young	68	54	0.426	0.529	0.630	0	9	17.6%	17.6%
Carissa Alexander	69	57	0.421	0.493	0.526	0	4	15.9%	8.7%
Sophia Holder	48	39	0.410	0.500	0.641	0	7	6.2%	12.5%
Leighton Cook	48	38	0.368	0.500	0.579	0	5	12.5%	12.5%
Aubrey Smith	39	35	0.400	0.436	0.514	0	3	17.9%	7.7%
Kenzie Shelton	9	8	0.375	0.444	0.875	0	2	22.2%	11.1%

- **Audrey Queen** almost never strikes out (6% K rate over 53 PA) — pitch to soft contact, not around her.
- **Isabel Montanez** walks 23% of the time (53 PA) — very patient, attack the zone early rather than nibbling.
- **Aria Escobedo** is an extreme ground-ball hitter (80% of balls in play) — tighten the infield when she's up.

Oct Outlaws 2012: Pitching Staff

Pitcher	BF	K%	BB%	Hit%	WP	PB
Juliette Mitchell	216	17.6%	13.4%	27.3%	11	2
Sophia Holder	117	27.4%	13.7%	17.1%	7	4
Addie Morgan	53	13.2%	15.1%	32.1%	2	5
Kenzie Shelton	32	37.5%	9.4%	25.0%	4	2
Isabel Montanez	13	7.7%	46.2%	15.4%	1	0
Kinslee Young	8	0.0%	12.5%	50.0%	1	0

- **Addie Morgan** is wilder (15% walk rate) — work the count, take borderline pitches.

Oct Outlaws 2012: Team Tendencies

- **Base stealing is a major weapon:** 96 attempts across 29 games (3.3/game) at a 95% success rate. Prioritize quick catcher pop times and varied pitcher hold times.
- **Rarely bunts** — no need to creep the infield corners in for bunt defense.

Port City Gameplan

Suggested Batting Order

Slot	Batter	PA	AVG	OBP	SLG	K%	BB%
1	Emma Goodman	30	0.476	0.633	0.762	10.0%	30.0%
2	Lucy Calla	32	0.429	0.562	0.524	9.4%	25.0%
3	Reagan Zimmerman	36	0.462	0.556	0.538	13.9%	16.7%
4	Caroline Edwards	22	0.400	0.455	0.900	27.3%	9.1%
5	Finley Andrews	28	0.273	0.429	0.318	17.9%	21.4%
6	Emma Lavelle	24	0.278	0.458	0.389	41.7%	25.0%
7	Paisley Bacon	27	0.304	0.407	0.304	18.5%	14.8%
8	Emory Ebner	27	0.273	0.333	0.364	22.2%	7.4%
9	Caroline Ogburn	34	0.125	0.382	0.125	23.5%	23.5%
10	Claire Ellisor	14	0.091	0.143	0.091	14.3%	7.1%

Ordered by a blended on-base/power/strikeout score ($OBP \times 0.5 + SLG \times 0.3 - K\% \times 0.2$), with the single highest-slugging bat pulled into the cleanup (4th) slot. Players below the plate-appearance threshold, and any names listed in *exclude_batters*, are left off.

Suggested Starting Pitcher

Pitcher	BF	K%	BB%	Hit%	WP	PB
Lucy Calla	121	23.1%	14.0%	17.4%	8	2
Claire Ellisor	55	18.2%	18.2%	18.2%	5	1

Against this opponent, control matters more than usual. Oct Outlaws 2012 steals at a 95% success rate — every walk and wild pitch is a near-certain stolen base. Lucy Calla's walk rate (14%) and wild-pitch rate (7%) make her the safer choice here.

Auto-Generated Strategy Notes

1. **Addie Morgan** is wilder (15% walk rate) — work the count, take borderline pitches.
2. **Audrey Queen** almost never strikes out (6% K rate over 53 PA) — pitch to soft contact, not around her.
3. **Isabel Montanez** walks 23% of the time (53 PA) — very patient, attack the zone early rather than nibbling.
4. **Aria Escobedo** is an extreme ground-ball hitter (80% of balls in play) — tighten the infield when she's up.
5. **Base stealing is a major weapon**: 96 attempts across 29 games (3.3/game) at a 95% success rate. Prioritize quick catcher pop times and varied pitcher hold times.
6. **Rarely bunts** — no need to creep the infield corners in for bunt defense.

Stats pulled from each team's full public GameChanger play-by-play logs. Batter identity recovered from free-text play descriptions rather than the scraper's own (unreliable) batter-tracking column. Sample sizes are typically 20–100 PA per player — enough to see real tendencies, not enough to treat any single number as certain, especially under ~20 PA.
